Submission: Objection

Comments: I would like to object in the strongest terms to this application. From where we live we can see the topology of one of the Rownall fields having changed in the past weeks and months. From one vantage point you can actually see what looks like a cliff edge on the perimeter of the field. I believe that this is where the soil and waste from the excavation has been tipped. There are implications for the water courses further down the hill from Rownall to Wetley Rocks. I'm perfectly sure that this shouldn't be happening and can only conclude that a proper waste management plan was never drawn up. If any of your officers would like to come and view the field from our house they are very welcome.
