Submission: Objection

Comments: I completely object to this for a number of reasons.

Obviously the close proximity to the petrol station. There is a serious risk of fire and explosion which these sites are prone to.

2. These batteries have a negative impact on wildlife which we have an area of natural outstanding beauty in Wetley Common with lots of wildlife.

3. Any water run off from this site when dealing with fires is likely to end up in the River Blythe causing environmental

damage.

4. The site is close to a number of private dwellings and a high school. This is a potential high risk of fire site which can

cause toxic vapour clouds.

Coupled with the sites at Rownall/Bagnall this is cumulatively large scale battery storage.
