Comments: I would like to raise concerns about this battery storage facility around the transport yard of Shirley's. What if theres a fire on the facility , batteries will burn out and not be easily put out and with so much power this could be a significant fire as well as all the wagons parked on the yard and large storage tanks of flammable liquid ie petrol diesel on the forecourt petrol station as well as the increase in traffic and exhaust gases of said vehicles . There are water courses around the area and varied wildlife which would be driven away by noise and light from such a installation
