Submission: Objection

Comments: Very concerned about the noise and light pollution created from not only the construction, but from the future use of such a large battery storage facility. I am not convinced that a suitable level of containment can be achieved, especially at night.

The dense collection of lithium-iron batteries and the operation equipment severely heightens the risk of fire or explosion, especially when stored in metal containers. The fire would not be easily controlled and would massively impact on the local residents and businesses if/when it happens.
