Submission: Objection

Comments: This application is an update to an original application, SMD/2024/0409, to retrospectively add in a window to the side of the extension.

Besides this window, I have no objections to the extension at all, but this window should not be allowed due to its position.

It overlooks, from above due to the height difference between the 2 properties, the patio and garden of the neighbouring property, Laureston. This is my mum's house and this window removes any sort of privacy that we as a family have when using the outside space of my mum's home.

I don't believe that anybody would be happy with such a situation, where someone else's lounge window so close to the boundary is looking down on their outside space.

In the delegated report of the original application (SMD/2024/0409), it mentioned that the build was in accordance with Policy DC1 of the Local Plan, because there were no habitable windows that would impact on the neighbouring property, Laureston. This new application means that this is no longer the case.
