Subject: Planning werrington clinic

[REDACTED]

Hi I am writing to oppose the proposed development on salters close the old clinic application number smd/2025/0504 the demolition of the clinic and 5 bungalows being built there is already an issue with parking on salters close with residents having more than one car and parking other vehicle on the clinic and also the parent who park on the foot path twice a day to drop children off at school I feel that if the east bungalow are built it will further add to parking issues in salters close even if the building have a drive way that won't elevate the parking where friends and family arrive where do they park over my drive probably I also have concerns with the further stress this will add to the local school and doctors as there is already limited space if any after the recent build of ashbank hights which has already added to lack off school spaces and issues at an already over stretched doctors I believe that the building off the 5 bungalow will only cause further issues sorry to rant on but I really think that they are not needed regards
