Submission: Neither

Comments: The request for the extension to provide a rehabilitation gym in at the premises would be of great benefit, not only to myself but to the local community.

It would provide an accessible local provision within the community. There is no other facility like this locally which means that people either have to travel (increasing pollution and road traffic volume) or forfeit utilising such a provision. I have personal experience of how beneficial physiotherapy can be and the positive impact it has had for me.

The provision of this service may also reduce pressure on NHS community services as patients would be able to utilise a local setting. I can only see this proposal as being beneficial to the health and wellbeing of local residents.
