Comments: We are writing to express full support for the planning application SMD/2026/0079, seeking approval for a single storey rear extension which will facilitate the creation of a rehabilitation gym as part of the physiotherapy business.

The property has been vacant for a long time, which has been a shame as it is a particularly attractive and characterful building. Bringing the building back into active use will be a significant improvement, enhance the vitality of the local area, and very importantly provide a valuable healthcare service. A rehabilitation gym will be of major benefit to the recovery of many of the patients.

As it is to be located to the rear it should have minimal visual impact on the surrounding area and neighbouring properties. Indeed the renovation of the building will secure its future as an asset to the village. This type of service has a very positive effect on the community. For these reasons we strongly support the application.
