Submission: Support

Comments: The proposed extension would allow the applicant to relocate from their current premises which has limited space and limited shared parking with other premises.. This proposal will benefit the local area by enabling the applicant to expand their physiotherapy services. Patients such as myself travel to Endon from relatively far afield, bringing income to the local area.

[REDACTED] I was pleased to see that the proposal is architecturally sympathetic to the original building, by matching the brick type and bond pattern as well as the overall form. The proposed extension is modest in size and set back at the corner to preserve the sightline of the neighbouring property. Parking at the site is ample for the services to be offered.
