Comments: The proposed extension would not impede on the car park behind the building, nor would it negatively effect the appearance of the building. It has the surrounding buildings, and residents, in mind and therefore only serves to improve and benefit the area.

The extension for the rehab gym, would allow downstairs clinical rooms that provides easier, and more access, which could be a limitation to some potential patients. It would also benefit the local area, improving the care provided, and helping take stress off the NHS, as it would support locals rehab, and their long-term functional abilities.
