-------------	---------------	-----------	-----	---------

Used to prevent debris from entering the pipes while allowing natural venting, this cast iron soil pipe vent cowl offers a modern solution with traditional aesthetics. Pre-painted in sleek black gloss paint, you can minimise time spent fitting the cowl on-site with a ready-to-install solution.

From the Traditional Express range by Hargreaves Foundry, this cowl is manufactured from sustainable cast iron material to maintain high performance for a lifetime. Due to the distortion resistance and sound-deadening properties, the sturdy design is particularly suitable for soil and waste solutions. Utilising push-fit sockets fitted with rubber sealing gaskets to enable joining to 100mm socketless pipes and fittings. A design that quickens the installation process, shrinking labour costs for each joint. Complete with full instructions optional and no specialist training required. If correctly installed, the system can last longer than 100 years with minimal maintenance. After using it for the needs of a building, the cowl can be fully recycled and not downcycled.

Features & Benefits: Hargreaves Foundry Cast Iron Soil Pipe Vent Cowl Traditional Express – 100mm

- Utilises push-fit sockets fitted with rubber sealing gaskets to join 100mm socketless pipes and fittings
- Suitable for listed properties and conservation projects
- Cast iron material with distortion resistance and sound-deadening properties
- Particularly suited for soil and waste solutions
- Manufactured to BS416 part 2 standard
- No specialist training required for fitting
- Pre-painted with black gloss paint for quick installation
- Can last more than 100 years if installed correctly
- Fully recyclable
- Replicates the appearance of a caulked lead jointed system
- Provides the heritage aesthetic appearance of traditional LCC soil systems

This contemporary cast cowl ensures and 'old-school' aesthetic. Replicating the heritage aesthetic appearance of traditional LCC soil systems and the appearance of caulked lead jointed systems. A perfect choice for listed properties and conservation projects. The quality itself is reassured by its manufacturing to BS416 part 2 standard, so you can rely on the cowl for years to come.
