With regards to the above planning application. In principle I have no objection to the above extension. My garden backs on to the application property. I am a keen Astronomer and use my garden for observing the heavens therefore I am worried about the possibility of an increase in light pollution. If it could be pointed out that if they wish to use decorative lighting that it is at a low brightness and aimed down. If they want security lights than again they are the minimum brightness, aimed down and use a timers so they are only on when needed.

Could the light pollution aspect be added to the conditions of the planning application.

Regards
Keith Jones
