Application no: SMD/2026/0184

Determined on: 09.06.2026.

**Town and Country Planning Act 1990
Town and Country Planning (Development Management Procedure) (England) Order 2015
(as Amended)**

FULL PERMISSION FOR DEVELOPMENT

This permission does not carry any approval or consent which may be required under any enactment, bylaw, order or regulation (e.g. in relation to Building Regulations or the Diversion of Footpaths etc) other than Section 57 of the Town and Country Planning Act, 1990.

Location of Development:

Land off Basford View, Cheddleton Staffordshire ST13 7HJ

Description of Development:

Self build bungalow with means of access and associated hard and soft landscaping works.

In pursuance of their power under the above mentioned Act, Staffordshire Moorlands District Council Planning Authority, **HEREBY GRANTS PLANNING PERMISSION** for the development described above subject to the following condition(s):

1. The development hereby permitted shall be begun before the expiration of three years from the date of this permission.

Reason:- To comply with the provisions of Section 51 of the Town and Country Planning, Planning and Compulsory Purchase Act, 2004.

2. The development hereby approved shall be carried out in accordance with the following submitted plans and subject to the following conditions and/or modifications:-

2022-2695-04 Rev B;
2022-2695-05
2022-2695-06

Reason:- For the avoidance of doubt, in the interests of proper planning and in accordance with the National Planning Policy Framework

3. The development hereby permitted shall be constructed as a self-build or custom build dwelling within the definition of self-build or custom-build housing in the 2015 Self-Build and Custom Housebuilding Act (as amended by the 2016 Housing and Planning Act or as defined within relevant successor legislation):

For a period of 3 years from the completion of the dwelling hereby permitted the occupation of the dwelling shall be limited to Mrs Sandra May Bickley and Mr Geoffrey Frank Bickley their spouse, partner, widow or widower and to any resident dependents and the dwelling shall be their sole or main place of residence.

Reason:- To ensure that the development remains a custom / self-build development and is therefore a genuine exemption to Biodiversity Net Gain requirements in accordance with Schedule 7A of the Town and Country Planning Act 1990

4. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) Order 2015 (or any order revoking and re-enacting that order with or without modification), no development as specified in Part 1 Class(es) A, AA, B, C, D, E, F and/or Part 2 Class(es) A, B and C, other than those expressly authorised by this permission, shall be carried out without express planning permission first being obtained from the Local Planning Authority.

Reason:- To enable the Local Planning Authority to control the development and so safeguard the character and visual amenities of the area, and to ensure that adequate private open space is retained within the curtilage of the building.

5. The development hereby permitted shall not be commenced until details of the existing and proposed levels across the site and relative to adjoining land, together with the finished floor levels of the proposed building(s), have been submitted to and approved in writing by the Local Planning Authority. The development shall be carried out in accordance with the approved details and there shall be no variation in these levels without the written approval of the Local Planning Authority.

Reason:- In order to ensure the satisfactory appearance of the development and its relationship to adjoining properties.

6. The development hereby permitted shall not be brought into use until the access, parking, and turning areas have been constructed in accordance with the approved plan Drawing No. 2022 2695 04 Rev B and surfaced in tarmac or another sustainably drained material. These areas shall thereafter be retained and maintained for their intended purposes for the lifetime of the development.

Reason: In the interests of highway safety.

7. The development hereby permitted shall not be commence until drainage plans for the disposal of foul and surface water flows have been submitted to and approved in writing by the Local Planning Authority. The scheme shall be implemented in accordance with the approved drainage details before the development is first brought into use.

Reason:- To ensure that the development is provided with a satisfactory means of drainage as well as to prevent or to avoid exacerbating any flooding issues and to minimise the risk of pollution.

8. Unless prior permission has been obtained in writing from the Local Planning Authority, all noisy activities shall be restricted to the following times of operations.

- "" 08:00 - 18:00 hours (Monday to Friday);
- "" 08:00 - 13:00 hours (Saturday)
- "" No working is permitted on Sundays or Bank Holidays.

In this instance a noisy activity is defined as any activity (for instance, but not restricted to, building construction/demolition operations, refurbishing and landscaping) which generates noise that is audible at the site boundary.

Reason: To avoid the risk of disturbance to neighbouring dwellings from noise during unsocial hours.

9. The development hereby approved shall adhere to the following at all times during the construction phase:

- No waste material associated with the construction shall be burnt onsite but shall be kept securely for removal to prevent escape into the environment. All waste transfer records shall be retained for inspection by officers of the Local Planning Authority;
- No activity hereby permitted shall cause dust to be emitted beyond the site boundary. In the event dust is caused to escape the site boundary the activity shall be stopped until sufficient dust suppression has been undertaken to prevent further escape. There shall always be the

appropriate means and sufficient water resources onsite for dust suppression. These shall be made available for inspection when required by officers of the Local Planning Authority.

Reason: To protect the amenities of the area during construction.

10. In the event that contamination including surface coal measures is found at any time when carrying out the approved development it must be reported in writing immediately to the Local Planning Authority. Development shall not continue further until an initial investigation and risk assessment has been completed in accordance with a scheme to be agreed in writing by the Local Planning Authority to assess the nature and extent of any contamination on the site. If the initial site risk assessment indicates that potential risks exists to any identified receptors, development shall not recommence until a detailed remediation scheme to bring the site to a condition suitable for the intended use by removing unacceptable risks to human health, buildings and other property and the natural and historical environment has been submitted to and approved in writing the Local Planning Authority. The approved remediation shall be carried out prior to the first occupation of the development.

Reason:- To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

11. No top soil is to be imported to the site until it has been tested for contamination and assessed for its suitability for the proposed development, a suitable methodology for testing this material shall be submitted to and agreed in writing by the Local Planning Authority prior to the soils being imported onto site. The methodology shall include the sampling frequency, testing schedules, criteria against which the analytical results will be assessed (as determined by the risk assessment) and source material information. The analysis shall then be carried out and validity evidence submitted to and approved in writing by the Local Planning Authority.

Reason:- To ensure that risks from land contamination to the future users of the land and neighbouring land are minimised, together with those to controlled waters, property and ecological systems, and to ensure that the development can be carried out safely without unacceptable risks to workers, neighbours and other offsite receptors.

12. The planting schedule and plan hereby approved shall be implement in full during the first planting season (October - February) following the commencement of development. The trees must receive sufficient maintenance to ensure they establish successfully including watering, mulching, weed management and formative pruning.

If any trees, shrubs or plants within the first five years from the date of planting are removed,

uprooted, destroyed, die, become diseased or seriously damaged they shall be replaced during the next planting season with trees of a similar size and species.

Reason: In the interests of biodiversity and the character and appearance of the area

Informatives

1. The application has been assessed against adopted Development Plan policies including the National Planning Policy Framework and any other material considerations including extant Outline permission reference SMD/2025/0162. As the application is acceptable there was no need for any negotiation and accordingly a sustainable form of development is approved.
2. Attention is drawn to condition number 4 of this approval, the effect of which is to withdraw permitted development rights in respect of development which would otherwise not require planning permission. You are advised to contact the Local Planning Authority Development Control Section telephone 0345 605 3013 before undertaking any other development in the future in order to ascertain whether planning permission is required.
3. Basford View is a private road and therefore does not connect with the public highway. The developer should ensure they have appropriate rights and permissions to carry out the work.
4. The applicant(s)/developer(s) is(are) advised that there may be unmapped transferred public sewers/assets on the property. You are advised to contact Severn Trent for discussions. You can contact Severn Trent via email: building.over@severntrent.co.uk or Tel : 0345 266 7930. Further information about the transfer, along with guidance to determine whether the property is served by a public sewer can be found online: <https://www.stwater.co.uk/mysupply/wastewater/lookingafteryoursewers/sewerpiperesponsibility/>
5. In the event that the residential unit is not occupied by the person(s) specified under condition number 3 above, the Council will consider occupation by other parties as a breach of planning control. In this case the Council will treat the completed dwelling as requiring demonstration of Biodiversity Net Gain uplift as per S98 Environment Act 2021 retrospectively.

It will therefore require the applicant to re-apply for the constructed dwelling retrospectively as an open market dwelling, with all necessary Biodiversity Net Gain documentation including a Biodiversity Metric, Biodiversity Gain Plan and a Habitat Management and Monitoring Plan. Failure to do so may result in formal planning enforcement action.

6. Please be aware that the responsibility for safe development and secure occupancy of the site rests with the developer.

A demolition or refurbishment asbestos survey and risk assessment should be carried out prior to the demolition of the existing buildings. The enforcing authority for this type of work is the Health and Safety Executive (HSE) and it is recommended that you contact them directly to discuss their requirements: <http://www.hse.gov.uk/>

Any approved foul drainage system should meet the British Standard 6297:2007+A1:2008: Code of practice for the design and installation of drainage fields for use in wastewater treatment <http://www.bsigroup.com>

Any approved noise scheme and measurements should pay due regard to British Standard BS8233: Sound insulation and noise reduction for buildings (Code of Practice), BS4142:2014+A1:2019 Methods for rating and assessing industrial or commercial sound and/or the Building Regulations 2010 Document E or other appropriate guidance.

Advice on controlling flies and light can be found in: Statutory Nuisance from Insects and Artificial Light (defra 2005) available as a free download
<http://archive.defra.gov.uk/environment/quality/local/legislation/cnea/documents/statnuisance.pdf>

During any demolition and construction activities (including landscaping) the contractor shall take all reasonable steps to prevent dust formation and prevent any dust formed from leaving the site boundary.

The control of dust and emissions from construction and demolition Best Practice Guidance, produced by the greater London councils
<http://www.london.gov.uk/sites/default/files/BPGcontrolofdustandemissions.pdf>

Building Research Establishment Guidance Document 'Control of Dust from Construction and Demolition Activities' (BR456)

If required, Contamination risk assessments shall be carried out in accordance with UK policy the Land contamination risk management framework (LCRM), published by the Environment Agency <https://www.gov.uk/government/publications/land-contamination-risk-management-lcrm>

Submission of reports should also be made to the Environment Agency for comment with regard to their remit to protect ground and surface waters from pollution and their obligations relating to contaminated land.

The Local Planning Authority will determine the acceptability of reports on the basis of the information made available to it. Please be aware that should a risk of harm from contamination remain post development, where the applicant had prior knowledge of the contamination, the applicant is likely to be liable under Part II (a) of the Environmental Protection Act 1990 and as such become an "appropriate person". In this event the applicant will be lawfully responsible to remove the risk posed by the contamination.

Equally if during any site works a pathway for any contaminant on site is created and

humans, waters, property or ecological systems are exposed to this, the applicant or those acting on behalf of the applicant will be liable under part II (a) of the Environmental Protection Act 1990 if the risks are not adequately addressed during the site redevelopment.

During investigation and remediation works the applicant and those acting on behalf of the applicant must ensure that site workers, public property and the environment are protected against noise, dust, odour and fumes. The applicant is advised that should there be a requirement as part of the Remediation Strategy to treat, reuse or remove contaminated material on the site, the Environment Agency must be consulted, as these activities may need to be licensed or permitted. Contaminated materials identified for removal off site must be disposed of in an appropriately licensed landfill site.

Staffordshire Moorlands District Council is keen to liaise with all stakeholders involved in this application. As such, we recommend that a proposed scope of works is forwarded to the Environmental Protection Department and agreed in principle prior to site investigation works being undertaken. The Environmental Protection Department is also prepared to review draft copies of reports prior to final submission to the Planning Department in order to ensure that works undertaken are sufficient to discharge the contaminated land conditions.

X 

Signed by: Jane Curley

On behalf of Staffordshire Moorlands District Council

NOTES

1. Approval under the Building Regulations may also be required. Advice in this respect can be obtained by contacting DBCP Limited, Web: dbcp.co.uk; Email: info@dbcp.co.uk ; Tel: 0333 880 2000.
2. Where a vehicle is often driven across a grass verge or kerbed footway to and from premises adjoining a highway, the occupier of the premises may, be required to pay the cost of construction of a crossing, and/or may be required to comply with conditions, imposed by the Authority. You should contact the Highway Authority at Staffordshire County Council.
3. This consent is granted subject to conditions and it is the owner(s) and the person(s) responsible for the implementation of the development who will be fully responsible for their compliance throughout the development and beyond. An application will need to be made to discharge conditions and a fee is payable with the application. For more details please refer to our web site: www.staffs Moorlands.gov.uk If there is a condition that requires work to be carried out or details to be approved prior to the commencement of the development this is called a “condition precedent”. The following should be noted with regards to conditions precedent:
 - (a) If a condition precedent is not complied with, the whole of the development will be unauthorised and you may be liable to enforcement action.
 - (b) Where a condition precedent is breached and the development is unauthorised, the only way to rectify the development is the submission of a new application.
4. Other conditions on this permission must also be complied with. Failure to comply with any condition may render the owner(s) and the person(s) responsible for the implementation of the development liable to enforcement action.
5. The permission is granted in strict accordance with the approved plans. It should be noted however that:
 - (a) Any variation from the approved plans following commencement of the development irrespective of the degree of variation will constitute unauthorised development and may be liable to enforcement action.
 - (b) Variation to the approved plans will require the submission of a new planning application.
6. If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.
7. If the decision to refuse planning permission is for a householder application, and you want to appeal against your local planning authority's decision then you must do so within 12 weeks of the date of this notice.
8. If this is a decision to refuse planning permission for a minor commercial application, and you want to appeal against your local planning authority's decision then you must do so within 12

weeks of the date of this notice.

9. If this is a decision to refuse express consent for the display of an advertisement, if you want to appeal against your local planning authority's decision then you must do so within 8 weeks of the date of receipt of this notice.
10. If you want to appeal against your local planning authority's decision for any other type of development, including listed building consents then you must do so within 6 months of the date of this notice Appeals must be made using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <https://acp.planninginspectorate.gov.uk>
11. The Secretary of State can allow a longer period for giving notice of an appeal, but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.
12. If either the local planning authority or the Secretary of State refuses permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted. In these circumstances, the owner may serve a purchase notice on the Council (District Council, London Borough Council or Common Council of the City of London) in whose area the land is situated. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.
13. Domestic sprinklers
Fire sprinklers operate automatically even if you are not at home releasing water directly over the source of the fire and sounding the alarm, they are unobtrusive and easy to install. Sprinklers are NOT expensive; normally costing around 1-2% of the cost of construction of a new building. The use of sprinklers will usually allow design freedoms as well, which can reduce construction costs and improve usability and design freedoms of the building. The chance of an accidental discharge is 16,000,000:1 If you would like further advice please contact Staffordshire Fire and Rescue Service (www.staffordshirefire.gov.uk)
14. Working smoke alarms correctly positioned in your home can save your life. The Fire Service recommends you have smoke alarms on every floor of your home, including in each bedroom, and make sure you test your smoke alarms at least once a month. Although the application of approved guidance and enforcement of regulations will give buildings the legally required baseline of fire protection, the Fire Service's viewpoint is many of these fall short of what we would consider adequate. This is why we campaign for the inclusion of sprinklers.
