[REDACTED]

Good morning,
We have submitted an objection for the above planning application.

Myself and my husband whom I have copied in reside at number 1 Spring view.

Our concerns alongside others relate to the culvert that runs behind and under our property.

It struggles to cope with prolonged periods of rain/sleet/snow (see attached videos) and we haven't yet recorded the heavier rainfall we have been receiving.

Our concern is the adjacent build the rain will have less places to go and cause flooding to our property and the rest of spring view/crescent.

Kind regards Jackie
