Subject: Fw: Planning Application SMD/2026/0170 Objection to amendment to plot 1 building height
Attachments: 20260617_182832.jpg

[REDACTED]

Good morning,

I write to formally object to the above application relating to the now incorrect building height of plot 1.

This issue causes further harm to the enjoyment of our property and further significant stress beyond what was previously advised, all comments noted in our originally objection continue to stand.

Attached is a photo of our now view following this build. Prior to approval our property enjoyed views over farmland to now an overbearing sense of enclosure, overshadowing and more loss of natural light, further impacted by the fact the property is built to high and much closer to the west boundary of our property.

Ground levels also are a concern for plot 1 and these can not increase further as this will impact and will cause damage to ours and neighbouring properties. It would be appreciated if you would respond to advise if ground level highs have impacted the height of the structure. Photos have been previously provided to show trench blocks at plot 1 above ground level, indicating that the ground level will increase and therefore will impact our property.

I would be grateful if you would communicate any considerations ahead of a formal decision.

Regards

Craig Milner
