Submission: Objection

Comments: I live at the bottom of these fields. They are at the side and back of my property. My main concern is flooding. When it rains heavy the water comes down from the fields and floods the garden to the extent that it comes to the bottom of the steps to the house which is at least 30 feet away from the fence. Ive had to get wellies to let the dog out. Lasr year we had to rebuild the little retaining wall because the water comes through the bricks as well as going over the top like a waterfall. Its horrendous because they ponies and donkeys so all the manure comes in the garden along with the water. Also the field at the side turns into a lake when it rains and the water goes into the culvert and floods the roads. My concern is where is all that water supposed to go
