Submission: Neither

Comments: Thank you for consulting the Peak and Northern Footpaths Society about this application.

We note that in the EIA Scoping Report the potential impact on users of recreational routes and public rights of way across the site and in the wider study area have been identified by the applicant. The paths have been described as principal visual receptors, and the effect of noise on the users of these paths has been included. It is stated that measures to mitigate these impacts will be undertaken. It is noted that the relevant definitive map of public rights of way (that produced by Staffordshire County Council, not Lancashire County Council as stated in the report) will be consulted, and that site visits to find the nature and severity of the impacts will be undertaken.

We can add no further opinions on the scoping report.

We will comment on the relevant details given in the EIA when this has been produced.
