Subject: Brown Edge planning application reference SMD/2026/0201

Categories: [REDACTED]

Dear sirs/madams,

To think of approving the above planning application would in my opinion be madness on a safety issue alone. A new build of 55 houses would more than likely increase the car traffic by more than a hundred because gone are the days of one car per household. In fact one house nearby has eight cars to the household. This massive increase in road traffic would be horrendous when you consider that rural Brown Edge has a sharp 90deg bend to navigate and the narrowest of footpaths (2ft wide) running right along side the busy B5051. As well as Brown Edge the increase in traffic would have a huge impact on the junction of Clay Lake onto A53 and of course the already dangerous Norton Green.

Under no circumstances should this application be approved.

Yours sincerely,
Geoff Blood
Resident of Clay Lake
