Submission: Objection

Comments: I have significant concerns about the proposed development in general but more specifically the proposed siting of turbine one. If this turbine is built in the proposed position, the object will tower more than 200 meters over our house (taking into account the elevation of our house and the proposed site) at a distance of approximately 365 meters. If built as proposed this will radically change our lives for the worse. We are worried about the proximity and the visibility of the turbine, the noise and flicker effect, the nighttime visual effects caused by the aviation lights, the possible impact on our private water supply and the impact on the wildlife on our land which is immediately adjacent. Above all I am worried about our future health and well being, both mental and physical. I should add that I am generally in favour of decarbonization of energy supplies but the siting of this development and in particular turbine one is totally inappropriate for it's geographical location and the many lives that will be impacted or even ruined if it is built as currently planned. We are already aware of significant impact to the well being of some local residents due to the worry and stress of dealing with this application without any informal consultation by the neighbour landowners who are involved in the application. My husband Michael Whitfield has made more detailed comments and requests about what he believes should be in scope for the environmental impact assessment. I assisted him in completion of his submission and I support him in the comments that he has made.
