Submission: Objection

Comments: As a resident in the area who will directly affected by the planned Wind Turbine Farm,

after careful review of the application documents, I have identified the following concerns :

The significant effects on the surrounding environment due to the location and size.

Impact on visual rural character including skyline and natural landscape, affecting both residents and potential visitors to the area

Impact on nearby conservation, heritage and listed buildings.

Impact on wildlife, due to proximity, including their habitat such as Woodland, Trees and vegetation.

Impact to local conservation areas, such as Ipstones, Foxt and Churnet Valley.

Impact from day and night noise, hours of shadow flicker and light pollution from aviation lighting required for turbines above 150m to the local community as well as visitors.

Affect to air quality, including the possible release of Radon gas, known to be prevalent in the area.

Safety and stability of the turbines, due to historical coal and ironstone mining in the construction area

Impact of construction of Turbines, including extra roads built and existing rural roads.

Financial impact to value of assets of residents within the proposed and surrounding areas.

It is my view, that all concerns put forward by local residents should be taken into full consideration before any decisions are made which will directly affect their lives and the surrounding countryside.
