

To whom it may concern

Following on from your letter to the community of Freehay, in reference to the planning application for the proposed development of Bracks Farm, we wish to put over our view and support.

Myself and my wife live directly opposite and overlook Bracks Farm and have resided here for 88 years.

We know Lee Bagnall personally as he himself has been a resident of Freehay for 25 years, living a short distance away at Brow Nook farm, directly behind Bracks Farm.

Over the last 25 years Lee has supported the village in various ways including, voluntary, mowing the grass verges around the local area, therefore improving the overall look of the village, especially for the people passing through.

Over the years the house and surrounding buildings have progressively deteriorated and have not been maintained. There are a number of out buildings built in various materials so this development will only improve the overall look. In particular the view over the property from our conservatory and patio will be aesthetically pleasing in comparison to the current one.

With this in mind and our other comments we absolutely and wholly support this application.

Regards Mr & Mrs Raymond Brookes, The Haven Freehay
