Application no: SMD/2026/0368

Determined on: 21.09.2026

**Town and Country Planning Act 1990
Town and Country Planning (Development Management Procedure) (England) Order 2015
(as Amended)**

FULL PERMISSION FOR DEVELOPMENT

This permission does not carry any approval or consent which may be required under any enactment, bylaw, order or regulation (e.g. in relation to Building Regulations or the Diversion of Footpaths etc) other than Section 57 of the Town and Country Planning Act, 1990.

Location of Development:

Sprinks Farm Dingle Lane Rushton Spencer Staffordshire SK11 0RX

Description of Development:

Erection of a purpose built slurry tower

In pursuance of their power under the above mentioned Act, Staffordshire Moorlands District Council Planning Authority, **HEREBY GRANTS PLANNING PERMISSION** for the development described above subject to the following condition(s):

1. The development hereby approved shall be begun before the expiration of three years from the date of this permission.

Reason: To comply with the provisions of Section 51 of the Town and Country Planning, Planning and Compulsory Purchase Act, 2004.

2. The development hereby approved shall be carried out in accordance with the details as submitted in the application form and submitted specifications and as shown in drawings: Location Plan; Elevations and Floor Plan Dwg Layout2; Site Plan revised received by e-mail dated 14.09.2026.

Reason: To ensure that the development is carried out in accordance with the submitted details and approved plans, in the interests of good planning, for clarity and the avoidance of doubt.

3. The external facing surface finishes to the metal walls of the slurry tank and to the roof

cover shall be dark green.

Reason: To help reduce the conspicuousness of the development in the surrounding rural landscape.

4. No re-cycled fill materials used in connection with the development hereby approved shall be imported to the site until and unless they have been tested for contamination and assessed for their suitability for the proposed development in accordance with a methodology that has first been submitted to and agreed in writing by the Local Planning Authority.

Reason: To ensure that the proposed development meets the requirements of the National Planning Policy Framework in that all potential risks to human health, controlled waters and wider environment are known and where necessary dealt with via remediation and or management of those risks.

5. Manure or slurry stored within the development hereby approved shall be managed in accordance with the recognised Best Practice outlined in the Protecting our Water, Soil and Air, a Code of Good Agricultural Practice for growers and land managers (DEFRA, 2009) and Code of Good Agricultural Practice for reducing ammonia emissions (DEFRA, 2024).

Reason: To protect the amenity of neighbours and guard against pollution of the environment.

6. By the end of the first full available planting season November to March following the first coming into use of the development hereby approved or its substantial completion, whichever is the earlier, the marked planting scheme shown on the revised site plan drawing hereby approved shall be completed to include as a minimum a native species hedgerow comprising a double row (30cm apart) of hawthorn (*Crataegus monogyna*) whips of stem height 20cm to 40cm planted at 45cm staggered spacings in each row. The plantings shall be protected from grazing wild mammals or livestock by means of guards and mesh fencing. Any plants which die or are lost or otherwise fail to establish in the first five years following the completion of the planting shall be replaced in the next available planting season (November to February inclusive) with plants of the form and size as originally planted. The plantings shall thereafter be allowed to grow and be maintained for the lifetime of the development.

Reason: In the interests of the appearance of the completed development in the landscape.

Informative

1. Farmers must notify their environmental regulator before they build the new or substantially altered stores. In England and Wales farmers are required to give us 14 days notice. This could be an 'informative' of any planning consent granted. Further guidance is available at: Storing silage, slurry and agricultural fuel oil - GOV.UK (www.gov.uk).

2. The proposed development is judged to be of suitable design and meets the tests of sustainability in planning. There are not judged to be any adverse implications for neighbours or wider public amenity and street scene. Amendments were agreed with the agent in the course of the determination in accordance with the approach to decision making as advocated in the National Planning Policy Framework at paragraph 39.

X *B.J. Haywood*

On behalf of Staffordshire Moorlands District Council

NOTES

1. Approval under the Building Regulations may also be required. Advice in this respect can be obtained by contacting DBCP Limited, Web: dbcp.co.uk; Email: info@dbcp.co.uk ; Tel: 0333 880 2000.
2. Where a vehicle is often driven across a grass verge or kerbed footway to and from premises adjoining a highway, the occupier of the premises may, be required to pay the cost of construction of a crossing, and/or may be required to comply with conditions, imposed by the Authority. You should contact the Highway Authority at Staffordshire County Council.
3. This consent is granted subject to conditions and it is the owner(s) and the person(s) responsible for the implementation of the development who will be fully responsible for their compliance throughout the development and beyond. An application will need to be made to discharge conditions and a fee is payable with the application. For more details please refer to our web site: www.staffsmoorlands.gov.uk If there is a condition that requires work to be carried out or details to be approved prior to the commencement of the development this is called a “condition precedent”. The following should be noted with regards to conditions precedent:
 - (a) If a condition precedent is not complied with, the whole of the development will be unauthorised and you may be liable to enforcement action.
 - (b) Where a condition precedent is breached and the development is unauthorised, the only way to rectify the development is the submission of a new application.
4. Other conditions on this permission must also be complied with. Failure to comply with any condition may render the owner(s) and the person(s) responsible for the implementation of the development liable to enforcement action.
5. The permission is granted in strict accordance with the approved plans. It should be noted however that:
 - (a) Any variation from the approved plans following commencement of the development irrespective of the degree of variation will constitute unauthorised development and may be liable to enforcement action.
 - (b) Variation to the approved plans will require the submission of a new planning application.
6. If you are aggrieved by the decision of your local planning authority to refuse permission for the proposed development or to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.
7. If the decision to refuse planning permission is for a householder application, and you want to appeal against your local planning authority's decision then you must do so within 12 weeks of the date of this notice.
8. If this is a decision to refuse planning permission for a minor commercial application, and you want to appeal against your local planning authority's decision then you must do so within 12

weeks of the date of this notice.

9. If this is a decision to refuse express consent for the display of an advertisement, if you want to appeal against your local planning authority's decision then you must do so within 8 weeks of the date of receipt of this notice.
10. If you want to appeal against your local planning authority's decision for any other type of development, including listed building consents then you must do so within 6 months of the date of this notice Appeals must be made using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at <https://acp.planninginspectorate.gov.uk>
11. The Secretary of State can allow a longer period for giving notice of an appeal, but will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal. The Secretary of State need not consider an appeal if it seems to the Secretary of State that the local planning authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.
12. If either the local planning authority or the Secretary of State refuses permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted. In these circumstances, the owner may serve a purchase notice on the Council (District Council, London Borough Council or Common Council of the City of London) in whose area the land is situated. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.
13. Domestic sprinklers. Fire sprinklers operate automatically even if you are not at home releasing water directly over the source of the fire and sounding the alarm, they are unobtrusive and easy to install. Sprinklers are NOT expensive; normally costing around 1-2% of the cost of construction of a new building. The use of sprinklers will usually allow design freedoms as well, which can reduce construction costs and improve usability and design freedoms of the building. The chance of an accidental discharge is 16,000,000:1. If you would like further advice please contact Staffordshire Fire and Rescue Service (www.staffordshirefire.gov.uk).
14. Working smoke alarms correctly positioned in your home can save your life. The Fire Service recommends you have smoke alarms on every floor of your home, including in each bedroom, and make sure you test your smoke alarms at least once a month. Although the application of approved guidance and enforcement of regulations will give buildings the legally required baseline of fire protection, the Fire Service's viewpoint is many of these fall short of what we would consider adequate. This is why we campaign for the inclusion of sprinklers.
